RUGS

**Care instructions and tips
for our rugs:**

- **Regular vacuuming:**

Vacuum your rug regularly to remove dust and dirt. Once a week is usually sufficient, but heavily trafficked rugs may require more frequent vacuuming.

- **Immediate stain removal:**

To remove stains from the rug, act immediately by absorbing excess liquid with an absorbent cloth or paper and avoid rubbing; instead, use a special rug cleaning solution or a mixture of water and vinegar.

- **Cutting threads:**

Longer threads on a rug is not a cause for concern and can easily be removed by cutting them flush with the pile without creating a hole.

- **Professional cleaning:**

Have your rug professionally cleaned at least once a year by a professional cleaning company. This will help remove deeper dirt and keep your rug in good condition.

- **Avoiding sunlight:**

Avoid exposing your rug to direct sunlight, as this can cause fading. Instead, use curtains or blinds to shield the sunlight.

- **Avoiding heavy furniture:**

Avoid placing heavy furniture on your rug, as this can cause impressions. Use felt pads under furniture to protect the rug.

- **Shedding:**

For woolen rugs, shedding is a common occurrence in the first few weeks due to the fine hairs that get stuck between the fibers during spinning. However, this is a sign of quality, and shedding will decrease over time as the fibers become more firm.

- **Special treatments:**

If your rug requires special treatments, such as stain protection or water-repellent treatment, consult a professional cleaning service or a rug dealer for advice.

Our rugs are crafted with great care and attention to detail. To maintain a rugs pristine beauty for as long as possible, it is recommended that you follow our instructions closely. If you have any further queries regarding the care of our rugs, please do not hesitate to reach out to our dedicated customer service team.
