

UV Lamp, Item No. S7199

Instruction for use:

Please be sure to read and follow the information and instructions below!

Safety Instructions

Keep the lamp out of the reach of children!

Risk of fire / burns!

The light tubes heat up during operation.

Do not place any flammable materials (e.g. paper) on the lamp and do not touch the light tubes with bare hands.

Protect the lamp from environmental influences such as smoke, dust, vibrations, chemicals, moisture, heat, or direct sunlight.

The UV lamp can be used to check the security features of banknotes, stamps, or credit cards.

It may occur that professionally counterfeited banknotes are not detected as such, or conversely, that genuine banknotes are mistakenly identified as counterfeit.

In case of doubt, it is recommended to check banknotes several times or consult a specialist.

Do not look directly into the UV light when it is switched on!

Risk of severe eye damage!

Do not disassemble or modify the lamp!

Scope of Delivery

- UV lamp
- User manual
- USB-C charging cable

Disposal Information

Dispose of the lamp separately from household waste.

Operation

To switch on the desired function, press the corresponding button (Button 1 LED / Button 2 UV-LED).

The display will turn on and show the current battery level.

After switching on, the UV lamp needs a brief moment before it is fully operational.

By pressing the UV button (Button 2) once, the 365 nm wavelength is activated.

Pressing it again activates the 395 nm wavelength.

Pressing it a third time switches off the UV lamp.

By pressing the LED button (Button 1) once, the white light is activated.

Pressing it again dims the white light.

Pressing it once more switches to warm light.

Pressing again dims the warm light.

A long press enables stepless dimming.

Connect the power plug to a properly installed socket and connect the USB-C plug to the USB charging port of the UV lamp.

During the charging process, the display remains switched on and shows the current charge level in percent.

When charging is complete, the display shows 100%.

Please disconnect the lamp from the power supply when it is no longer needed.

Product Specifications

LED-Types:	Lamp 1	White LED light + warm LED light
	Lamp 2	UV-LED 365 nm + UV 395 nm

Color: black

Size 153 x 30 x 30 mm

Weight: approx. 160 g

Battery: 1500 mAh, 18650 rechargeable lithium battery
