It is not allowed to remove the type plate.

▲ If the aforementioned points are not observed, a short circuit or electric shock may occur! **There is danger to life!**

2. General safety instructions

▲ The complete installation may only be carried out by an authorized electrician who is familiar with the applicable guidelines. Hereinafter referred to as „qualified electrician“.

▲ For safe handling of the product, the user must have read and understood the installation/operating instructions completely before using the device for the first time.

▲ The product may only be used if it is alright. If the device or parts of it are defective, it must be repaired by a qualified electrician.

▲ Only use lamps/light sources approved by the manufacturer. The max. lamp wattage in watts is not allowed to be exceeded.

▲ This product is not a toy and is not allowed to be stored or used within the reach of children.

▲ Safe operation of the product is only guaranteed if these instructions are followed. Therefore, keep these assembly/operating instructions. SSC-LUXon GmbH accepts no liability if the instructions given here are not followed or the lamp is subjected to improper use.

3. Assembly & configuration

▲ **Caution:** The connecting cable must be disconnected from the power supply before starting work (switch off the main switch/fuse)! Only use parts which are supplied with the product or which are clearly marked as equipment! Otherwise the product may not be sufficiently safe!

▲ The cable routing shown in the illustrations is for simplified purposes only. They in no way represent a recommendation for connection! The connection may only be carried out by a qualified electrician.

▲ When drilling, pay attention to cables and gas and water lines. Always route the cable so that it does not touch the light.

3.1 Assembly location

The product is suitable for indoor and outdoor installation. Do not cover the product under any circumstances, especially not with insulating material, fire hazard!

4. Operation, faults & disorders

▲ **Caution:** The connecting cable must be disconnected from the power supply before starting work (switch off the main switch/fuse)!

What to do in case of error?

In the event of a fault, the unit must be switched off immediately. The product may only be operated if it functions faultlessly. The unit may only be put back into operation after it has been checked by a qualified electrician! **This is the case if:** 1. there is visible damage, 2. the product is not working correctly, 3. there is smoke, steam, or audible crackling noises, 4. overheating can be detected

▲ **Caution:** There is a danger to life - repairs to the product or work on parts carrying mains voltage may only be carried out by qualified electricians.

Avoidance of disturbances and fire hazards:

It is not allowed to cover the product under any circumstances. Air circulation must be ensured. Nothing may be attached or hung on the product, especially no decoration.

5. Cleaning & care instructions

The product may only be wiped dry or carefully with a slightly damp and lint-free cloth. The product is not allowed to be removed for this purpose. Do not use abrasive or sharp objects or aggressive cleaning agents. Do not use solvents.

Assembly instructions PALISO garden socket with light

1. Disconnect the connecting cable from the power supply! Unscrew the cover counterclockwise to be able to insert the G9 light source. Screw the cover back on clockwise. **Fig.1**
2. Loosen the two screws on the bottom and remove the bottom plate. **Fig.2**
3. **Direct mounting e.g. on wooden substrates:** Screw the base plate to the desired substrate with the screws. **Fig.3**
- 3.1. **Direct mounting e.g. on concrete or stone:** Mark the drill holes and drill them. Insert the dowels into the drill holes. Guide the supply line through the opening in the middle. Screw the energy profile to the desired surface with the screws & dowels. **Fig.3 & 4**
4. Pull the cable connection unit out of the enclosure. Use the auxiliary rail inside for this. **Fig.3 & 4**
Loosen the four screws of the cable connector box and remove the cover. Connect the connecting cable to the column (luster terminal L, N & protective earth). **Fig.7**
5. Screw the cover back on with the four screws. Make sure that the seal does not slip. If necessary, fix the outgoing cable with the strain relief. **Fig.7**
6. Guide the cable connection unit with the auxiliary rail back into the enclosure and screw it back onto the base plate from step 2.
7. Switch the connecting cable to voltage - The product is now ready for use. **Fig.6**
