

16/17 Boots

Boots Uniquely Designed To Fit Any Feet With A Focus On Comfort, Performance, And Built To Last.

With our new 16/17 snowboard boot collection we have focused on making the world's most comfortable boots that push performance, weight, innovations, and fit levels past the industry standard. Working together closely with our team riders to produce boots that offer enough support, response, and foothold for their pro-level of riding while making them comfortable enough for the weekend warrior to enjoy season after season has been our main goal. We are proud to announce we have developed a new sole for unbeatable durability and shock absorption, VIBRAM® ICETREK OUTSOLE with D3O® SHOCK ABSORPTION. We have also upgraded our liners by adding an even more comfortable performance liner called the new D3O® ENHANCED CLOUD 10 LINER, which we have equipped with our new ORTHOLITE® TRIPLE DENSITY FOOTBED for all day charging comfort. It's a new season, filled with new innovations, boot models, and comfort performance technologies, with the trusted reliability and durability that Nitro has always offered for decades.

NEW Ortholite® comfort from the inside out

NEW ORTHOLITE FOOTBEDS

Together with Ortholite, the World's Leading Supplier of Open-Cell Foam Insole Technology, we have developed new footbeds in dual and triple density versions for different levels of support and comfort. OrthoLite compresses less than 5% with excellent levels of shock absorption and energy return. Fit and comfort inside the boot will remain consistent for the life of the OrthoLite product.

The unique open cell structure of OrthoLite also creates a moisture management system inside the boot by moving moisture away from the foot leaving foot drier. When the foot is removed from the shoe any remaining moisture dries very quickly due to the airflow allowed by the open cell network in the foam.

OrthoLite contains a patented anti-microbial formulation to fight fungus, bacteria, and odor. The biocide is added during formulation so that it is linked to the foam and will not wear off or lose effectiveness over time. The Aegis anti-microbial treatment is EPA and FDA approved.

OrthoLite is extremely lightweight providing optimum performance and without adding excess weight to the boot. OrthoLite is completely washable and will not hydrolyze. Just throw them in your washing machine and they come out like new.

LAZY RECOVERY FOAM

LAZY RECOVERY FOAM

OrthoLite Lazy Recovery Foam conforms to the foot creating a comfortable, custom fit. When you remove your foot from the boot, the Lazy foam instantly rebounds to its original shape.

X-40 HIGH REBOUND

X-40 HIGH REBOUND

Pushing for a foam technology with higher rebound properties, OrthoLite developed the X-40 High Rebound formulation. This list of its kind foam boasts the elasticity rating is over 40 percent and is ideal for footwear used in high impact sports.

.11 LOW DENSITY

Developed to provide a high performance, lightweight foam option, the OrthoLite .11 density foam is ideal for footwear products that can benefit from a resilient, drier, and healthier liner.

NEW

NITRO exclusive TECH FEATURE

NEW VIBRAM® OUTSOLE MADE OF ICETREK VIBRAM® COMPOUND AND D3O® DAMPENING

Developed to provide improved grip on icy and snow surfaces, enhanced with supreme dampening properties from the new D3O® dampening pad, VIBRAM® ICETREK COMPOUND allows you to move more freely in cold climates, while the D3O® material provides the shock absorption and dampening you need for any conditions or riding styles. VIBRAM® ICETREK COMPOUND is usable in all seasons, it represents the best solution for everyday conditions encountered from the Equator to the North Pole. The softness allows the compound to adhere to smooth surfaces and to support aggressive draws to improve traction on challenging terrain. In conjunction with sole designs that utilize small pointed lugs and a large supporting surface, VIBRAM® ICETREK COMPOUND with D3O® DAMPENING allows you to move with confidence and comfort season after season.

NITRO
exclusive
TECH FEATURE

TLS 5 TWIN LACING SYSTEM

TLS 5 Twin Lacing System

Nitro is leading the pack with the TLS 5 lacing system: Easy lace engagement and release, combined with the low abrasion of our Dyneema® laces are the key factors of this highly reliable zonal lacing system. At the same time, the TLS 5 features compact size and low weight while maintaining the reliability proven by tens of thousands of days on the mountain. Even though rarely needed, servicing and replacement of all parts including the lace is easier than with any other system on the market. Even using a standard lace if you're in a pinch is an option only available on Nitro's TLS boots. Easy-entry handle storage pockets as well as our Bail Out system for an easier entry and exit round off the most developed dual lacing system on the market.

NITRO
exclusive
TECH FEATURE

D3O®

D3O TECHNOLOGY

D3O® is a smart material that moves slowly and increases comfort when in a normal state, but when shock or impact is increased the materials lock together to absorb and disperse energy created upon impact, before instantly returning to its flexible state. What this means is that the material increases overall comfort of the liner by absorbing impact from deep landings or choppy snow conditions – allowing you to go faster and deeper all day!

NEW

NEW RE/LACE LINER LOCKER

Another innovation from your friendly developers at Nitro: The new RE/LACE Liner Locker provides easy adjustability of your inner boot lacing when your boot shell is already tightened (tied), by just pulling up on the lace handle. This allows you to (re)tighten your liner and foothold throughout the day (on and off the chairlift) without having to untie your boot.

NITRO
exclusive
TECH FEATURE

LINERS OVERVIEW

NEW

NEW Cloud 10 Liner

Our premium liner combines the best technology in foothold, comfort, warmth, and dampening properties. The ultra lightweight Thermacell material provides featherweight comfort, while the new TRIPLE DENSITY ORTHOLITE FOOTBED provides ultimate comfort and fit. Equipped with our new ENHANCED D3O TECHNOLOGY for supreme dampening and shock absorption properties for comfort and support for hard landings, bumps, no matter how cold or warm it is. Designed to provide maximum performance while upholding world-class comfort. Heat moldable.

PRE-MOLDED THERMACELL: for perfect out-of-the box fit
 NEW RE/LACE LINER LOCKER: for a snug and easy to operate closure
 ILS POWER STRAP: for a snug top closure
 HI-HEEL FRAME: more response and a precise fit
 LATEX MEMORY PADS: for a life time heel fit
 FLEX TOE: expands for custom toe box fit
 DIRECTIONAL NON-SLIP HEEL GRIP LINING: keeping your feet where they belong
 NEW TRIPLE DENSITY ORTHOLITE FOOTBED: for ultimate control and cushioning
 NEW ENHANCED D3O TECHNOLOGY: absorbs energy and keeps your ankles protected

Cloud 9 Liner

Our flagship liner combines ultra lightweight Thermacell material with comfort and fit. Our signature latex heel pads provide lifetime heel fit, while the clutch tongue makes boot entry and exit easier. The Cloud 9 liner features an additional power strap for a snug fit on top and a triple density footbed with air bag for maximum cushioning and comfort. Heat moldable.

PRE-MOLDED THERMACELL: for perfect out-of-the box fit
 ILS POWER STRAP (only SELECT): for a snug top closure
 HI-HEEL FRAME: more response and a precise fit
 NEW RE/LACE LINER LOCKER: for a snug and easy to operate closure
 LATEX MEMORY PADS: for a life time heel fit
 FLEX TOE: expands for custom toe box fit
 DIRECTIONAL NON-SLIP HEEL GRIP LINING: keeping your feet where they belong
 NEW TRIPLE DENSITY ORTHOLITE FOOTBED (Team): top notch control and cushioning
 D3O TECHNOLOGY: for energy absorption in the ankle area

Cloud 6 Liner

Our Cloud 6 liner is ultra comfortable and highly flexible. Molded from lightweight Thermacell material, this liner provides all-over cushioning for maximum impact absorption. Featuring our internal lacing system and molded latex heel pads for infinite heel fit and our flex toe construction for a highly customized feel. Heat moldable.

PRE-MOLDED THERMACELL: for perfect out-of-the box fit
 LO-HEEL FRAME: more flex and a precise shape
 NEW RE/LACE LINER LOCKER (FOX model): for a snug and easy to operate closure
 LATEX MEMORY PADS: for a life time heel fit
 FLEX TOE: expands for custom toe box fit
 NEW DUAL DENSITY ORTHOLITE FOOTBED (Fox): top notch control and cushioning
 DUAL DENSITY FOOTBED (Venture): for zonal support and dampening

Cloud 3 Liner

Our most versatile liner, the Cloud 3 combines Thermacell material, molded latex heel pads and a Lo-Heel Frame into one lightweight, comfortable package. Heat moldable.

PRE-MOLDED THERMACELL: for perfect out-of-the box fit
 COMFORT PANELS: for a precise fit without pressure points
 LO-HEEL FRAME: more flex and a precise shape
 LATEX MEMORY PADS: for a life time heel fit
 DLS Direct Lacing System: featuring Dymeema® loaded low-friction laces for ultimate fit and comfort
 FLEX TOE: expands for custom toe box fit
 ANATOMICAL FOOTBED: provides shock absorption and comfort

NEW Cloud Liner

Our most versatile and comfortable youth liner provides an unparalleled sure foothold with its INTERLOCK SYSTEM, and PRE-MOLDED EVA. Developed to keep a growing foot happy, comfortable, warm, while maintaining the foothold that you need for progression. Heat Moldable.

PRE-MOLDED EVA: for QUICK FIT
 DLS Direct Lacing System: for snug fit and comfort
 EVA FOOTBED: provides shock absorption and comfort
 NEW INTERLOCK SYSTEM: no heel lift

LINERS OVERVIEW

NEW

NEW Cloud 9 Women's Liner

Our new high end Cloud 9 Women's specific liner was developed to offer undisputable precision, comfort, and warmth for the ladies who desire the best. The new RE/LACE LINER LOCKER allows for all day fit customization without unlacing your boots, tighten your boots throughout the day anyway on hill. Molded from Pre-Molded Thermacell materials for a featherweight comfortable fit. This liner provides all-over cushioning, support, and fit from our new DUAL DENSITY ORTHOLITE FOOTBED with D3O TECHNOLOGY. The dampening properties of this sure fitting liner are enough to make you want to go bigger, longer, and never take them off. Heat Moldable for maximum customization, obviously.

PRE-MOLDED THERMACELL: for perfect out-of-the box fit
 COMFORT PANELS: women's specific shape in the cuff area
 HI-HEEL FRAME: more response and a precise fit
 NEW RE/LACE LINER LOCKER: for a snug and easy to operate closure
 LATEX MEMORY PADS: for a life time heel fit
 FLEX TOE: expands for custom toe box fit
 NEW DUAL DENSITY ORTHOLITE FOOTBED: top notch control and cushioning
 D3O TECHNOLOGY: for energy absorption in the ankle area

Cloud 6 Women's Liner

Our Cloud 6 women's liner is ultra comfortable and highly flexible. Molded from lightweight Thermacell material, this liner provides all-over cushioning for maximum impact absorption. Featuring our internal lacing system and molded latex heel pads for infinite heel fit and our flex toe construction for a highly customized feel. Heat moldable.

PRE-MOLDED THERMACELL: for perfect out-of-the box fit
 COMFORT PANELS: women's specific shape in the cuff area
 HI-HEEL FRAME: more response and a precise fit
 LATEX MEMORY PADS: for a life time heel fit
 FLEX TOE: expands for custom toe box fit
 DUAL DENSITY WOMEN'S FOOTBED: for zonal support and dampening

Cloud 3 Women's Liner

Our most versatile liner, the Cloud 3 combines Thermacell material, molded latex heel pads and a Lo-Heel Frame into one lightweight, comfortable package. Heat moldable.

PRE-MOLDED THERMACELL: for perfect out-of-the box fit
 COMFORT PANELS: women's specific shape in the cuff area
 LO-HEEL FRAME: more flex and a precise shape
 LATEX MEMORY PADS: for a life time heel fit
 DLS Direct Lacing System: featuring Dymeema® loaded low-friction laces for ultimate fit and comfort
 FLEX TOE: expands for custom toe box fit
 ANATOMICAL WOMEN'S FOOTBED: provides shock absorption and comfort

Cloud 1 Women's Liner

Our Cloud 1 women's liner is lasted from lightweight Thermacell material with a pre-molded, anatomically shaped tongue for extra fit and support. Heat moldable.

PRE-MOLDED THERMACELL: for perfect out-of-the box fit
 DLS Direct Lacing System: for snug fit and comfort
 FLEX TOE: expands for custom toe box fit
 EVA FOOTBED: provides shock absorption and comfort

NEW

NEW Cloud Women's Liner

Our most versatile and comfortable girls youth liner provides an unparalleled sure foothold with its INTERLOCK SYSTEM, and PRE-MOLDED EVA. Developed to keep a growing foot happy, comfortable, warm, while maintaining the foothold that you need for progression. Heat moldable for maximum customization

PRE-MOLDED EVA: for QUICK FIT
 DLS Direct Lacing System: for snug fit and comfort
 EVA FOOTBED: provides shock absorption and comfort
 NEW INTERLOCK SYSTEM: no heel lift

HEAT MOLDABILITY

Our Cloud Liners are constructed from lightweight Thermacell material, using Nitro specific lasts and our signature Latex Heel Pads. This ensures long lasting fit and comfort without fatigue. While this is not necessary, all our liners can be thermo-molded (heat molded) for an even more custom fit. Specific heating system and tools are available.

NITRO Boot Tech

QLS Quick Lacing System
Why should the smallest shredders not benefit from advanced boot tech? The QLS system benefits from all the same tech features of the TLS, such as thin Dyneema® loaded laces and a cleat with optimized metal cleats. The QLS is the ultimate system for small boots and small hands: easy to use, effortless and fast.

Air Dampening
Our trusted AIR suspension technology is now featured on even more models. The best shock absorbing technology on the planet sucks up hard landings and keeps your heels from getting bruised. This noticeable difference in ride and comfort does not compromise response or control.

Armored Spine
We are using an anatomically shaped and 3D molded heel reinforcement to provide even boot flex and long-lasting heel fit.

FLEX LINK
A flexible panel between upper and lower shell ensures an even flexing, responsive boot without bulk.

RUBBER OUTSOLE
A highly effective traction pattern, combined with an abrasion resistant high-grip rubber compound provides perfect grip, no matter if you're hiking up the park or down the stairs to the bathroom...

VIBRAM® ICETREK COMPOUND:
Developed to provide improved grip on icy and snow surfaces, Vibram® ICETREK allows you to move more freely in cold climates. Vibram® ICETREK compound will not scratch or damage interior floors or absorb liquids or dirt, while offering grip and traction on icy surfaces. Usable in all seasons, it represents the best solution for every condition encountered from the Equator to the North Pole. The softness allows the compound to adhere to smooth surfaces and to support aggressive draws to improve traction on challenging terrain. In conjunction with sole design that's utilizing small pointed lugs and a large supporting surface, Vibram® soles realized in Icetek Compound allow you to move with confidence.

EVA Outsole
To reduce weight even more, we are using full EVA outsoles on selected models. While keeping weight low, the EVA also provides great impact absorption and thermal insulation.

NITRO Boot Tech

EVA Midssole
Used on all boots with rubber outsoles, the EVA midssole provides cushioning and thermal insulation.

Rubber Impact Panels
Selected EVA outsoles are reinforced with strategically placed rubber reinforcements for added resistance.

THERMINATOR SHIELD
This thermal layer between sole and liner will reflect your body heat and keep your feet warm all day.

ILS (Internal Lacing System)
Our ILS system features a lacing harness firmly connected to the boot shell. This harness snugly wraps around the liner, securing it in the shell and providing precise lacing and fit. Our engineered ILS laces provide less friction and a Dyneema® core for added strength.

DLS (Direct Lacing System)
Directly connected to the liner, the DLS also features Dyneema® loaded low-friction laces on selected models for ultimate fit and comfort.

POWER TONGUE STIFFENER
For those looking for adjustable stiffness throughout the day or season, you can use our removable tongue stiffener to change between premium precision or more of a relaxed feel. From the steep and deep to the groomers you can customize your boot feel perfectly for your personal style.

BAIL OUT SYSTEM
Designed to make unlacing the TLS system even easier. This pull tabs that is placed in the middle of the TLS lacing system on the outside of the boot allows for effortless unlacing and recording breaking speeds for taking your boots off.

NEW INTERLOCK SYSTEM
Developed to help keep the liner heel in one place and eliminate any kind of heel slippage or lifting. This ladder unit helps connect the liner heel to the shell to help generate the world's best foothold. Say goodbye to heel slipping and hello to all day comfort and foothold.

EL MEJOR TLS

NEW

Finally Comfortable Performance Is Here

Description

Precision, Response, and Performance is often correlated to rigid, stiff, and uncomfortable - not the El Mejor. We decided to develop the most comfortable performance boot on the market - Introducing the new EL MEJOR TLS. Equipped with our NEW VIBRAM® OUTSOLE MADE OF ICETREK VIBRAM® COMPOUND AND D3O® DAMPENING, for maximum traction and dampening attached to a real leather shell for long-lasting durability. Response, precision provided by the FLEX LINK DESIGN, while the stiffness of the boot is balanced with the comfort of our Air Dampening in the sole and in our new ORTHOLITE® TRIPLE DENSITY FOOTBED. The highly anticipated D3O® ENHANCED CLOUD 10 LINER provides a foot hold so comfortable and reliable it feels like you never have to take the boots off - they are that comfortable. World-class performance, with lastback comfort!

Spoil Yourself With Comfort

Description

The Cuda offers years of engineered technology to keep you feet warm, comfortable, and snug at an affordable price. Whether you are a weekend warrior or you work on the mountain the new RUBBER OUTSOLE, WOMEN'S CLOUD 1 LINER, and WOMEN'S EVA FOOTBED will keep your feet happy and warm season after season. The TLS TWIN LACING SYSTEM allows for record times from the parking lot to the chair, without having to take your gloves off. Comfort starts with perfectly fitting, warm, and comfortable feet.
