

Front axel

1. Disassemble the front shock
2. Disassemble the spring
3. Add the 35 mm spacer at first

4. Cut the bump stop 10 mm (first ring)
5. Assemble the shock

Rear axel:

1. Disassemble the rear shock
2. Disassemble the spring
3. Add the 40 mm spacer at first

4. Cut the bump stop 20 mm (on the black ring)
5. Assemble the shock
6. Open and close all rubber bearing to avoid any tension on the axel link
