

Which Multifix size is installed on my machine?

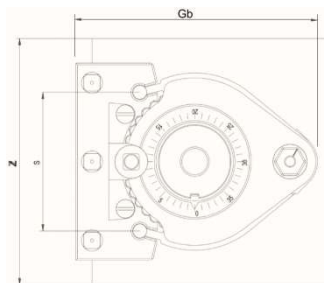

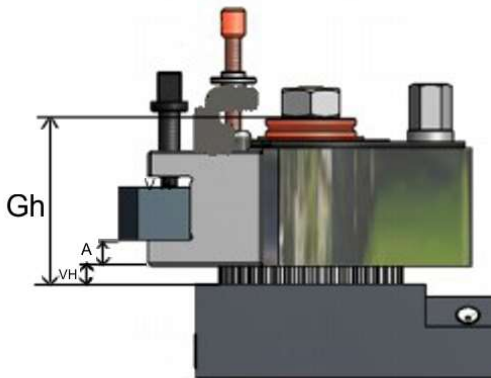

Determining the correct size for reorders

Please measure the following 3 parameters and then compare them with the table below:

1. Total height of steel holder head (Gh in the left drawing)
2. Pitch "S" in the tool holders (holes that are pushed onto the base head / "S" in the middle drawing)
3. Diameter of the toothed central body (right photo)

Size (AXA / Multifix)	00/Aa	11/A	15/E	22/B	33/C	44/D1	55/D2
Total height "Gh" (without clamping nut)	37	54	66	75	105	122	135
Centre distance "S" of the mounting holes	34	56,5	70	84,5	112,7	135	162
Diameter of the toothed central body	32	61	75	90	120	140	175
