Racing Positioning

- After the race starts, players need to flexibly turn the steering wheel to handle curves, using the accelerator and brake to control speed.
- In drift mode, players need to press the steering wheel button or pull the lever while mastering drifting skills to slide through curves and maintain speed.
- The nitro boost lever can be pulled on to activate and increase speed to overtake opponents.
- In the game, pay attention to track obstacles and collisions with opponents, and enjoy the thrill of high-speed racing."
