WWW.KICK-BIKE-SCOOTER.COM

The common name of the respective spare tyre is on the far left of the document. The official **ETRTO measurement** is in second place in the tyre size overview. In the third column you see the circumference x width. The French designations are in the penultimate column. For the most important tyre types and sizes we have added further information and links. Each rim has a certain margin, as do the possible spare tyres. It is possible to use nearby alternatives of a similar size. Brand new are the extra thick FAT Max tyres.

We supply you with spare tyres in all common sizes for bicycles, trailers, scooters, BMX and mountain bikes with extra thick tyres. Furthermore, we carry the necessary tubes with various valves for each spare tyre.
