

**Green Cell**

# GC Power Inverter

## Product card

### Specification:

|                                                            |                      |
|------------------------------------------------------------|----------------------|
| Model:                                                     | INV23                |
| Input voltage [V]:                                         | 24V                  |
| Output Power/Peak Power:                                   | 1000W / 2000W        |
| Sine Wave:                                                 | Modified             |
| Socket type:                                               | F                    |
| Fuse Rating [A]:                                           | 30A                  |
| Number of fuses:                                           | 2                    |
| Current consumption<br>without load [A]:                   | 0,42A                |
| No-load power<br>consumption:                              | 10,08A               |
| Efficiency at a load of approx.<br>90% of the rated power: | 85%                  |
| Dimensions (LxWxH):                                        | 26,4 x 13,5 x 7,6 cm |
| Dimensions<br>with mounting bracket:                       | 27,2 x 13,5 x 7,8 cm |
| Weight (g):                                                | 1716g                |
| Cross-section of cables<br>included in the kit (mm ^ 2):   | 6                    |
| Number of wire pairs<br>included in the kit:               | 1                    |
