## Parts List

---

- |                     |                         |
|---------------------|-------------------------|
| 1.Car body *1       | 7. Car seat*1           |
| 2.Steering Wheel *1 | 8. Remote control*1     |
| 3.Front wheels*2    | 9. Charger*1            |
| 4. Rear wheels*2    | 10. Gasket*7            |
| 5. Wheel covers*4   | 11. Pin*5               |
| 6.Windshield*1      | 12. Screw*1             |
|                     | 13.Mercedes-benz logo*1 |

## Assemble steps

---

### I Wheels Installation

1. Install left and right front wheels: first put one gasket on front axle, then install the wheel, put another gasket outside the wheel and use cotter pin to lock it. (as shown above.)

2. Install driving wheel: first install the motor and connect it, put the wheel on, then one gasket and a cotter pin to lock it.

3. Install wheel cover: buckle it on the wheel, press it till a sound “ka” for fixation.

### II Windshield Shelf Installation:

Press down the windshield shelf into the relative gaps on the vehicle.

## Assemble steps

---

### III. Steering Wheel Installation

First remove the screws and nuts, then connect the wires, insert the steering wheel in the steering rod. Align the side screw holes, lock it with the screws and nuts,

### IV. Seat Installation

First connect the wires correctly, then place the seat in the position as picture shown then fix it to car body by 1 screw.

# Method of use

## Warning!

\* For the remote control function, please take reference to the instruction in the remote control box.

\* To avoid gearbox and motor damage, ensure the vehicle has completely stopped when shift gears.

\* Running function: Set in the switch in forward, the vehicle will move forward when you stepping on "foot switch". Set it in backward state, the vehicle will run backward. Set the switch in the middle, the vehicle can not move. (If the car has remote control function, you can also control the car with the controller.)

## charging

Charging must be done by adult

### **Warning!**

To avoid fires and electric shock:

---Only allowed to use the battery and charger prescribed by the manufacturer.

Prohibit to use the other brand.

---Do not put the battery and charger in other products.

---It is not allowed to change the line structure privately.

---Do not link positive terminal and negative terminal by any conductor

---Please keep the battery dry, far away from any liquid

---When charging, do not smoking nearby, any flames may cause explosion.

---Please charge the vehicle in well ventilated, dry area.

# Charging precautions

- \*Batteries can not be reversed.
  - \*battery type: colsed dry battery.
  - \*Please check the charger,battery and plug before charging, if any damage found, stop using unless repair intact.
  - \*It's normal for battery heating in charging process,if the temperature is too high, please check either the current flow is too strong or battery internal short-circuit
  - \*To avoid likely damage caused by battery to child,must fix the battery with platen
  - \*if the vehicle unused for long time, it must be fully charged, and charge once each month to ensure the battery life.
  - \*Batteries are only to be charged by adults or children at least 8 years old.
  - \*the batteries of the remote controller are non-rechargeable, do not charge them.
- Batteries should be installed with the correct polarity. Do not mixed different types of batteries or new and used batteries. Exhausted batteries must be removed from the vehicle.

When charging,turn off the power switch.

Before first use,recommend to charge 4 to 6 hours but not more than 10 hours

When the vehicle speed slows down obviously, indicating the battery is low,please charge.

After use,please charge 4 to 8 hours,not exceeding 20 hours.charger

## TROUBLESHOOTING

---

### ■ Problem: The car will not move

Answer 1: Please make sure the charger has been removed from the car charging point

Answer 2: The battery is low on charge. Please charge for 6–8 hours but not exceeding 10 hours

Charge at least once a month to keep the cells active.

To avoid fuse cut off the power:

1. Max:30kgs, overload is forbidden
2. Do not drag any item behind this product.
