ACTING

We are all acting in a time that is characterized by uncertainty and change; closed shops, changed buying behavior, scarce resources and rapidly rising cotton prices. A global pandemic that has hit our production country India hard and with it us and our actions also.

And yet, there is hope - especially now and especially in our industry: Consumers want more sustainable fashion, and more people are becoming aware of the topic in general. A political framework has been provided by a new supply chain law in Germany, which is supposed to force companies to take on more responsibility. We at MELA, together with our partners in India, have once again worked hard for you. Despite higher cotton prices, our new S/S22 collection deliberately refrains from price increases, while maintaining very high margins.

For the first time we are offering trousers, chinos, shorts and culottes for both men and women. We have expanded our top sellers in the knitwear, wovens and jersey categories and have added a cozy sweat collection. The collection is rounded off by a new backpack and many new colors for the pre-existing models.

We look forward to acting together with you,
Your MELA team

TOGETHER

We are the world's leading fashion brand for sustainable textiles made out of Fairtrade certified organic cotton.

When we started our journey five years ago, we set out to expand the limits of what is possible in sustainable fashion design: There was no truly sustainable backpack, Fairtrade and GOTS certified on the market – so we made one. Sustainable sneakers, according to GOTS, were deemed impossible to make – so we did it. Living wages were considered too expensive – so we paid them without raising our prices.

Thanks to our 250+ retailers across Europe we have rapidly expanded our collection from garments to backpacks to sneakers. The world population is calling for sustainable change to protect our beautiful planet. That's exactly what we do at MELAWEAR each and every day.

All of our products are 100% Fairtrade Cotton, GOTS & Grüner Knopf certified.*

The Fairtrade Cotton Standard recognizes 100% fairtraded cotton products with its certification that furthermore have a transparent supply chain up to the respective cotton field. Amongst others, this includes a fixed minimum price for the cotton farmers as well as the compliance with social and environmental standards. In addition, the cooperatives receive a Fairtrade Premium, which is used for joint projects.

*Due to current shortages, some styles may be without Fairtrade cotton.

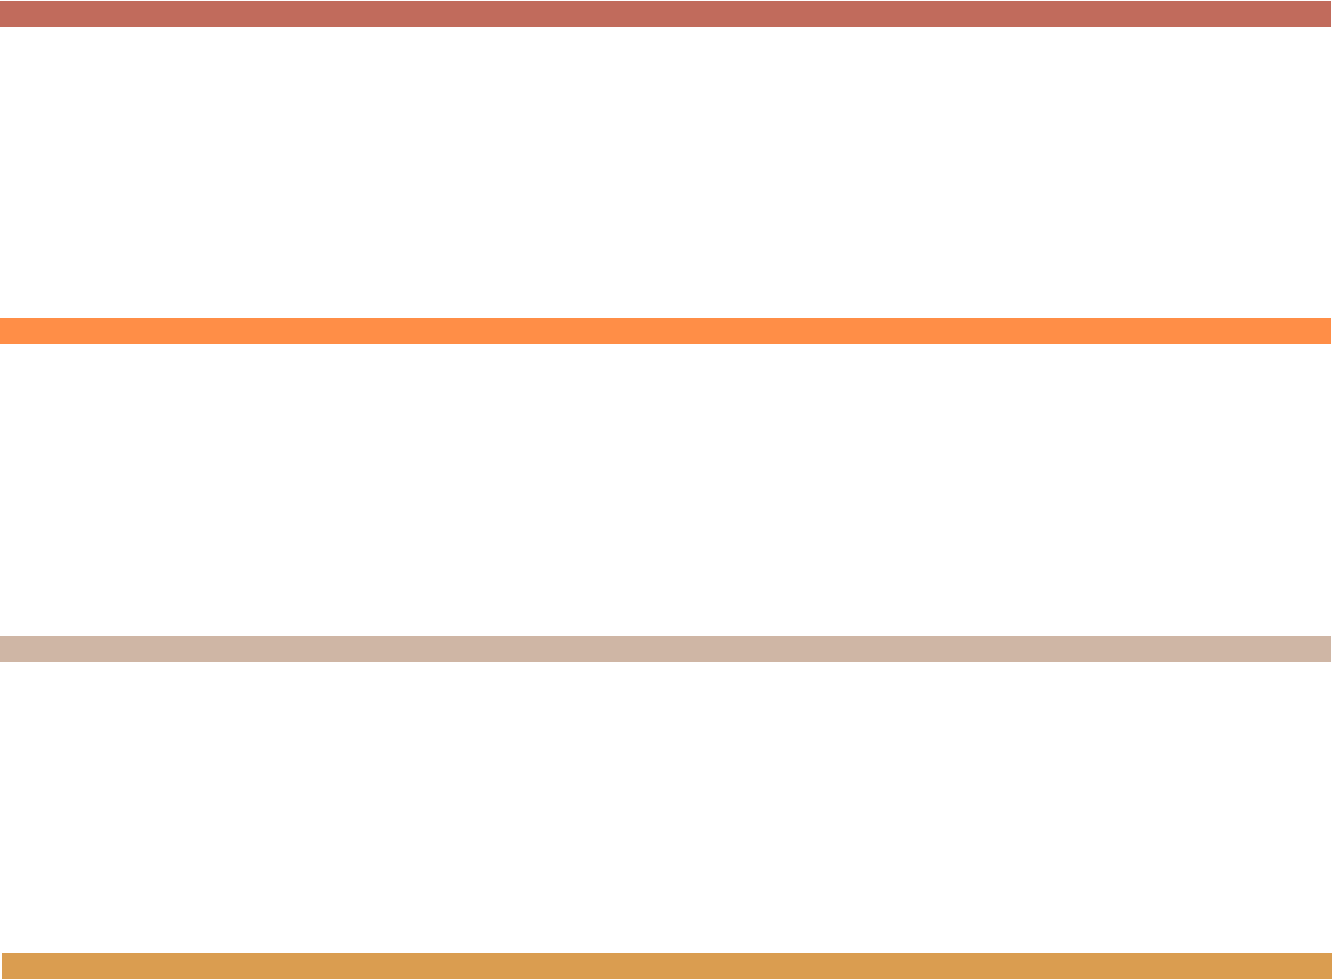

The Global Organic Textile Standard is the world's leading standard for the processing of textiles made from organically grown natural fibers. The standard specifies strict environmental requirements along the entire textile production chain and at the same time demands compliance with social criteria. All MELAWEAR products are GOTS certified and are made from 100% Indian organic cotton.

Grüner Knopf is the first German government-run label to combine requirements for the manufacture and production of textiles and for the entire company and its duty of care. A total of 46 demanding criteria must be met, of which 20 are corporate criteria and 26 are social and ecological product criteria. All MELAWEAR products are certified with the Grüner Knopf.

Inspiziert durch Cradle to Cradle

The Cradle to Cradle approach stands for the use of Materials that will not harm our environment but serve as nutrients for our planet in continuous Materials cycles. Inspired by this concept, we permanently optimize our products to achieve a closed cycle in the textile industry. Thus, parts of our collection are made from dyes and yarns certified to the Cradle to Cradle Gold Level. Also, the majority of the energy used to manufacture our products comes from renewable sources.

MELA SNEAKERS

Design meets sustainability

MELA sneakers are the first shoes in the world to be certified by the Fairtrade Cotton Standard and the Global Organic Textile Standard (GOTS). The sneakers are all-rounders: The robust organic cotton canvas makes the sneakers particularly breathable.

The leather is vegetable-tanned and chromium-free. The natural rubber soles cushion the feet and ensure a soft and comfortable fit. At the same time, they give the sneakers flexibility and grip.
