

Assembly instructions

Football Dart XXL

1 IMPORTANT INSTRUCTIONS BEFORE YOU START ASSEMBLY:

Therefore, read these assembly instructions carefully and completely, before you begin.

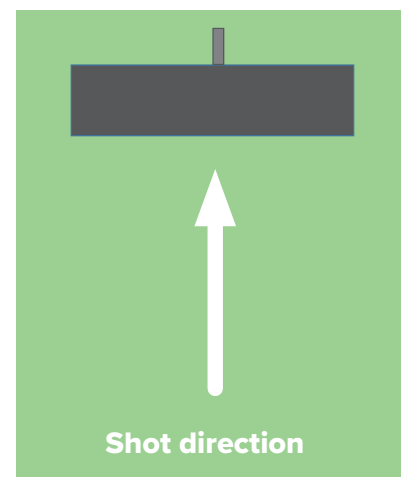

By planning in advance and following the steps in the correct order, you can be sure that the installation will be safe and a huge success for your event. In addition, the equipment will not be damaged.

2 Preparation and basics for operating this unit.

1. The system may only be operated in dry and windless weather conditions or indoors.
2. Electrical supply lines must be compatible with the unit, and in the event of any damage, shut down the unit immediately.
3. This equipment is not a bouncy castle and should not be stepped on or loaded.
4. The equipment must be properly secured according to the instructions; if the ground does not allow this, you must use weights as anchoring points, or secure it to walls or similar.
5. As soon as the equipment is in operating condition, it must be accompanied by a supervisor/safety person at all times.
6. The removal of the balls may only be done by hand or with a scoop net.

3 Assembly instructions 1/4:

1. Remove the football dart from the storage bag and unroll it on a clean and dry surface!
ATTENTION! For the protection of the velcro of the dart
 => **Avoid letting the front velcro disc come into contact with the ground or the lawn so that it does not get dirty.** This way the balls will stick better and longer.

Assembly instructions 2/4:

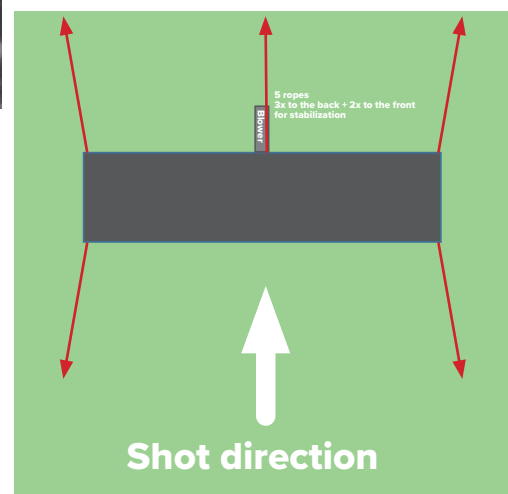

2. Secure the 4 handles (at ground level) with the provided anchors.
=> **ATTENTION! Be careful when whacking!**
Do not damage the dart board!
3. Check the connection of the blower to the hose. Hose must not be twisted.
4. Check that the „emptying openings“ are closed

3

Assembly instructions 3/4:

5. Attaching the anchoring ropes to the corresponding loops (top).
6. Switch on the blower
ATTENTION!
Manual counter-securing on the ropes
7. Tension the ropes according to the instructions, as soon as the unit is completely filled with air.
ATTENTION!
The dart must be in a vertical position position after tensioning.

Disassembling instructions

Football Dart XXL

**1**

Important notes before you start disassembling:

ATTENTION!

Disassembling the unit must be done in a dry condition!

If this is not possible, all parts must be dried.

Make sure that not a single part is soiled!

The disassembly is always done in reverse order of the set-up.

Turn off the blower and open the „emptying opening“ for quick emptying.

Make sure that the dart board collapse so that the target is facing upwards.

In order to protect the target from dirt, fold it against each other so that it lies on the inside.

Remove all the anchors and ropes and bring the dart board into the state as it was delivered.

Make sure that all the components listed on the contents list are present and therefore complete. So that nothing is missing for the next set-up!

Please read the instructions again.
