

# Assembly instructions

## Aluminium Minitor foldable

1

Your Minitor comes pre-assembled, in folded state.

2

First fold the two sides of the main frame apart.

3

Then turn the two side tubes backwards (the net will then cover the two outer stabilising tubes).

4

Then fold down the two parts of the rear connecting tube.

# Assembly instructions

## Aluminium Minitor foldable

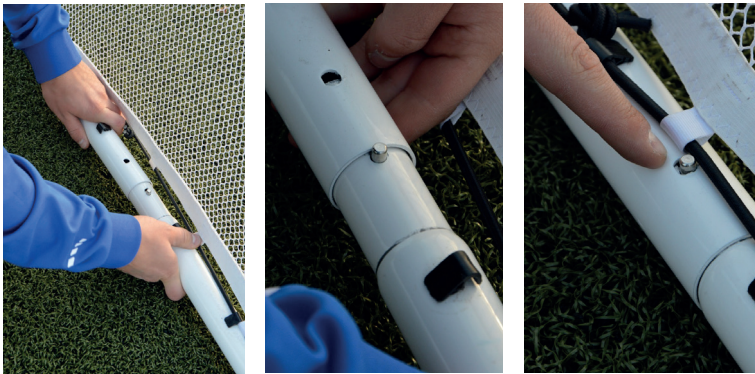

5

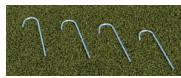

Push the pipe with the smaller end diameter into the corresponding counterpart of the other pipe.

6

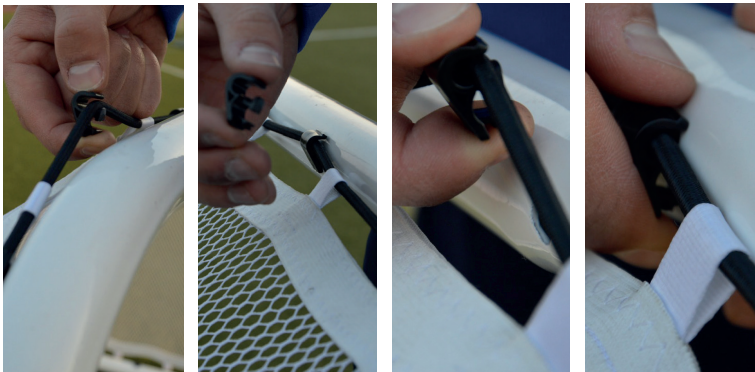

Push the two tubes into each other up to the locking pin, push it into the tube and push both tubes further into each other until the locking pin engages in the hole.

7

\* Not included in the package

Watch out for safety! The gate can tip over. On lawns or similar surfaces use earth hooks (pegs\*) for a safe stand, on hard floors or in the hall use an anti-tipping device (special counterweight\*!)

### Net change:

You can remove the black net hooks from the holes in the tube by slightly turning/tilting them and remove the rubber tension rope and net from the frame. To attach the net to the tube, place the tensioning rope in the upper recess on the net hook and push it back into the hole on the frame. It is best to start in the middle and work your way down along the frame, hole by hole.
